

Diverse Global exceeds customers' expectations with a comprehensive range of high-quality, customized products that are always delivered on time, all with outstanding, knowledgeable customer service.

ABOUT DIVERSE GLOBAL

**OUR EXPERIENCED TEAM DELIVERS THE HIGHEST-
QUALITY PACKAGING SOLUTIONS CUSTOMIZED TO FIT
YOUR SPECIFICATIONS AND YOUR SCHEDULE**

WHY DIVERSE GLOBAL?

Diverse Global Corporation exceeds our customers' expectations with a comprehensive range of high-quality, customized products that are always delivered on time, all with outstanding, knowledgeable customer service.

We serve the automotive, appliance, food service, and other industries by designing, assembling, distributing, and servicing a wide range of customized packaging and dunnage solutions. At Diverse Global, we pride ourselves on giving you direct access to our experienced team of decision makers, meaning that your needs are met without delay.

Diverse Global delivers top-notch products customized to fit your specifications and schedule. We're a one-stop shop for all your packaging needs, providing steel racks, sewn bags, plastic corrugated, a variety of dunnage solutions, and plastic totes and bulk containers.

COMPANY PROFILE

Our team has used its expertise to deliver high-quality packaging solutions to some of the most prominent companies in the world. Over the years, we have gained extensive experience manufacturing packaging for a variety of industries. Diverse Global's customized products protect parts that go into product markets all across North America, including car and truck assembly plants and a wide variety of recreational and consumer products. With our headquarters in West Michigan, our operations are flexible and efficient, fully equipping us to address your needs in a timely manner.

ABOUT DIVERSE GLOBAL

OUR SERVICES

**DIVERSE GLOBAL GIVES YOU DIRECT ACCESS
TO DECISION MAKERS WHO WILL RAPIDLY
RESPOND TO ALL OF YOUR NEEDS.**

ENGINEERING

Diverse Global's engineers listen to your needs and design products to fit your specifications. Making use of state-of-the-art design software, our expert team can create a customized design or work with one you submit. In either case, you will receive the exact design you need to get the job done on time.

MANUFACTURING

The team at Diverse Global is perfectionistic about our manufacturing process—only the highest quality products leave our facilities. We are fully equipped to assemble packaging rapidly and efficiently and deliver it to you on your timeline, whatever your project is and wherever you are located.

PROTOTYPING

We understand your scheduling requirements and are happy to expedite samples and prototypes to accommodate your needs. From plastic corrugated containers to steel racks, no project is too complicated for our experienced team to prototype. Plus, we're flexible about correcting or changing samples when you need us to.

PROGRAM MANAGEMENT

Customer service is our top priority, so Diverse Global's team carefully manages your project from start to finish. We'll collaborate with you to put budget plans in place and coordinate on-time delivery. You'll have access to a decision maker throughout the process, ensuring that your needs are met quickly and efficiently.

DUNNAGE SOLUTIONS AND PLASTIC PRODUCTS

Ds

DUNNAGE SOLUTIONS

We know that your packaging needs are specific, so we customize dunnage solutions to meet your needs. Customization means that your components will be ideally protected and presented for assembly. Diverse Global offers a variety of non-abrassive packaging solutions to ensure that painted and Class A surfaces arrive undamaged. For increased part density, we can incorporate sewn bags, vacuum thermoformed trays, specialty foams or fabrics, or plastic corrugated or solid plastic partitions.

FOAM DUNNAGE

PLASTIC DUNNAGE

PLASTIC PRODUCTS

Diverse Global offers a range of plastic containers customized to fit the specific needs of your project. Plastic packaging is a strong, durable solution for your material handling system. Both bulk containers and handheld totes come in straight-wall varieties for increased durability, as well as nesting or collapsible varieties for more efficient storage when not in use. Plastic packaging can also be outfitted with a variety of internal dunnage systems to ensure your products are well protected. Diverse Global also meets its clients personalized needs by providing custom plastic corrugated totes and sleeve packs. We assemble our corrugated plastic containers using durable, lightweight materials that are fully capable of standing up to the wear and tear of use in your supply chain. Diverse Global's corrugated plastic packaging protect your components, make it easy to identify parts, and facilitate the loading and unloading process.

SEWN BAG DUNNAGE

Sbd

SEWN BAG DUNNAGE

Using high tensile strength, tear-resistant materials, Diverse Global designs and manufactures sewn bags that are simultaneously lightweight and the toughest on the market. These dunnage solutions are exceptionally durable, yet flexible and capable of protecting your most fragile components.

Diverse Global uses soft, pliable materials to custom-fit the solution you need for your project. To create a tailor-made dunnage solution, we integrate bags into steel racks, bulk containers, and plastic totes. The design of our bags allows parts to better nest in each cell, better protecting each component. This also means that you can fit a greater number of parts in each container and make more efficient use of both money and space.

If you have a material handling challenge involving Class A surface protection requirements, fabric bag and pouch dunnage systems are ideally suited for the job. Fabric bags are strong, durable options for integration into your current containers, or we can incorporate them into a new, customized packaging system.

Sr

STEEL RACKS

When you need packaging that's stronger and more durable than a molded plastic container, steel racks are perfect for the job. Diverse Global's steel packaging is built for the long haul. We design and assemble our steel rack systems from top to bottom. These tough, reliable containers are customized to fit your needs, with interiors that ensure that products arrive not only undamaged, but also beautifully and efficiently presented. Many of our racks are designed to be collapsible for highly efficient storage and return shipping. Plus, if you have specific shipping, work-in-progress, or storage needs, we can integrate plastic corrugated, foam, and/or sewn bags into the design.
