

DIVERSE GLOBAL

RST FOAM FOR RUST PREVENTION

RST FOAM FOR RUST PREVENTION

BENEFITS

EASY-TO-USE

Simply place in tote, container or covered rack (or: covered RZR rack)

CONTINUOUS PROTECTION

Prevents rust for up to 36 months (dependent upon conditions)

SAFE

Rust prevention free of oils, solvents and other harsh chemicals

CLEAN

Non-fibrous and leaves no residue

SIZE OPTIONS

Offered in multiple sizes/perforated sheets

MULTI-METAL COMPATIBILITY

Protects both ferrous and non-ferrous metals

PROTECTION

Ideal for use in enclosed, non-ventilated spaces

PADDING

Provides surface protection and cushions against sharp corners or fragile metal parts

LIGHTWEIGHT

Does not drive-up shipping costs or weight limitations on racks

Protect your metal parts, components or accessories from rust and corrosion while in storage or transport with Diverse Global's RST Foam for Rust Prevention -Protected by ARMOR.

We combined open-cell polyurethane foam with the rust-preventing power of ARMOR VCI (vapor corrosion inhibitors) Nanotechnology™ to create RST Foam for Rust Prevention. ARMOR's proprietary formula of VCI releases vapors that form an undetectable, moisture-resistant shield on the surface of metal that is clean, safe and blocks rust.

Work smarter, not harder to keep metal parts clean and corrosion free with RST Foam for Rust Prevention – it is lightweight, flexible and can be sized to fit into any storage tote, container or RZR rack.

ARMOR VCI Nanotechnology™

For best results: enclose or cover tote
